CORAL SATIN

F₁ HYBRID MULTIFLORA PETUNIA

ALL-AMERICA  SELECTIONS

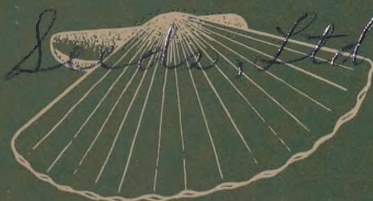

1961

1960 CROP

BODGER

Ed Monte, Calif

NEW

WHITE SATIN PETUNIA — Electros #3129H, \$47.50 per set.

The Satin

WHITE SATIN

F₁ Hybrid
Multiflora Petunia

The "Satin" type hybrid petunia plant is distinctive and difficult to attain. However, this compact, rounded, persistently dwarf habit of growth is greatly admired, and the addition of White Satin to the series is most welcome.

The 2 inch, slightly creped blooms appear early and freely, covering the plants with a blanket of white.

NEW

CORAL SATIN

F₁ Hybrid
Multiflora Petunia

More pre-introduction enthusiasm has been generated for Coral Satin in advance trials than any petunia since Red Satin. The very compact, very dwarf plants hold their form and produce masses of lovely coral-rose blooms, an intensification and deepening of the color found in Peach Satin. Illustrated on the front cover.

PINK SATIN

F₁ Hybrid
Multiflora Petunia

The delightful, never-out-of-bloom, rose-pink member of the Satin series. Absolutely top quality.

PINK SATIN PETUNIA — Electros #3109GA, \$40.00 per set.

Petunias

RED SATIN

F₁ Hybrid

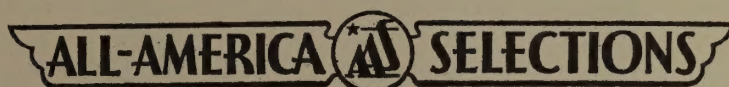

Multiflora Petunia

Easily the most admired red petunia, this All-America winner produces brilliant scarlet-red blooms which hold their color even under hot sun. But at least equally admired is the plant itself, for the dwarf, rounded, compact habit of growth is the ideal form for this flower class. The plants maintain their compactness to the very end of the season without splitting apart in the center or requiring any pruning.

RED SATIN PETUNIA — Electros #3135G, \$40.00 per set

CORAL SATIN

1961

We liked it so well we chose it for our front cover illustration, and now, when we are well along with the color printing, we are delighted to learn the All-America judges liked it, too.

Coral Satin, an F₁ hybrid multiflora intermediate in color between Red Satin (also an All-America winner) and Peach Satin, has low compact plants, high resistance to damage in rainy weather, and the All-America Bronze Medal for 1961.

NEW

WHITE SATIN PETUNIA — Electros #3129H, \$47.50 per set.

The *Satin*

WHITE SATIN

F₁ Hybrid

Multiflora Petunia

The "Satin" type hybrid petunia plant is distinctive and difficult to attain. However, this compact, rounded, persistently dwarf habit of growth is greatly admired, and the addition of White Satin to the series is most welcome.

The 2 inch, slightly creped blooms appear early and freely, covering the plants with a blanket of white.

Petunias

RED SATIN

F₁ Hybrid

Multiflora Petunia

Easily the most admired red petunia, this All-America winner produces brilliant scarlet-red blooms which hold their color even under hot sun. But at least equally admired is the plant itself, for the dwarf, rounded, compact habit of growth is the ideal form for this flower class. The plants maintain their compactness to the very end of the season without splitting apart in the center or requiring any pruning.

RED SATIN PETUNIA — Electros #3135G, \$40.00 per set

PEACH SATIN PETUNIA — Electros #3108H, \$47.50 per set.

PEACH SATIN

F₁ Hybrid

Multiflora Petunia

Peach Satin regularly appears among the ten best multiflora F₁ hybrids in comparative trials, and to some judges it is the best of all because of its appealing color. Young blooms are almost coral in tone, softening as the flower unfolds to a warm salmon-pink. Plants are compact, floriferous and long-lasting. Peach Satin is earlier, larger flowered and slightly taller than Red Satin.

The Lustre

BLUE LUSTRE

F₁ Hybrid Grandiflora Petunia

Early and continuous in bloom, Blue Lustre is the leading large flowered, deep purple-blue hybrid.

ROSE LUSTRE

F₁ Hybrid Grandiflora Petunia

Brand new, and of dazzling brilliance, Rose Lustre has low-growing, free-flowering plants; the wavy and fringed flowers are of the brightest imaginable rose color, accentuated by a light yellow, veined throat.

BLUE LUSTRE PETUNIA — Electros #3113G, \$40.00 per set.

NEW

ROSE LUSTRE
PETUNIA
Electros #3134K
\$75.00 per set.

Petunias

SCARLET LUSTRE

F₁ Hybrid Grandiflora Petunia

In petunias, red is the favorite color; in grandifloras, Scarlet Lustre is the favorite scarlet-red hybrid.

SALMON LUSTRE

F₁ Hybrid Grandiflora Petunia

Salmon Lustre beguiles with softness, for the masses of blooms give an effect of rare loveliness indefinable in color but delightful in aspect. Pressed for a description, we'd say it is light salmon.

SCARLET LUSTRE PETUNIA — Electros #3122G, \$40.00 per set.

SALMON LUSTRE
PETUNIA
Electros #3133K
\$75.00 per set.

New

SNOW TIME ZINNIA — Electros #3130J, \$55.00 per set.

SNOW TIME

Giant Cactus Flowered Zinnia

A good white cactus flowered zinnia has been needed for a long while, and Snow Time fills this need.

It is vigorous and full-sized in plant, nicely cactus flowered in type, and nearer to pure white than any variety yet marketed. Flowers measure about 5 inches across, matching the others in the "Time" series in size, and constituting an important though minor percentage in the new Dark Jewels mixture.

LILAC TIME ZINNIA — Electros #3131J, \$55.00 per set.

LILAC TIME

Giant Cactus Flowered Zinnia

Most widely trialed of the new cactus flowered varieties, Lilac Time has excited favorable comment in all parts of the world. It is available in ample quantity for the first time this year.

The variety comprises a pleasant range of shades of rosy lilac, with the young petals in the center of the bloom distinctly lighter than when fully expanded.

Plants grow 2 to 3 feet tall, are well branched, and bear many giant 5 inch blooms in the true cactus type. This strain is also an important component of the Dark Jewels mixture described and pictured on the opposite page.

Cactus Flowered Zinnias

DARK JEWELS

Giant Cactus Flowered Zinnia Mixture
Deep and vivid colors make this Giant Cactus Flowered Mixture different from anything you have ever seen before. The strong orange, flame, scarlet, golden yellow, lavender, spiraea red and cherry blooms dominate the mixture, with just enough white to lend relief. Earlier cactus flowered mixtures were pastel in effect; Dark Jewels concentrates on the rich colors that stand out in the garden. Included as a part of the Dark Jewels formula are all the new cactus flowered varieties presented on these two pages.

DARK JEWELS ZINNIA — Electros #3125G, \$40.00 per set.

CHERRY TIME

Giant Cactus
Flowered Zinnia

Cherry Time comprises closely related hues in the series of cherry, rose red, spiraea red and magenta rose, all in heaviest saturation.

Blooms are true cactus type, 5 inches in diameter, and carried on vigorous, full-sized plants.

This variety provides one of the most impressive components in the Dark Jewels mixture (above), but its strength and unique color make it a most desirable flower in solid plantings as well.

CHERRY TIME
ZINNIA
Electros #3124J
\$55.00 per set.

Zinnia Novelties

*Pink
Lady*

Electros #3126K
\$75.00 per set.

This new California Giant Zinnia unfolds with delightful pink center petals, the outer petals turning to cream or buff on exposure to the sunlight. Protected from the sun by cloudy weather the pink extends to the edge of the bloom. Different!

for All the World

Electros #3097K
\$75.00 per set.

*Ortho
Polka*

Better than ever this year, Ortho Polka has flowers twice the size of Peppermint Stick, with a high percentage of gaily striped blooms in yellow and red, orange and red, and rose and white, plus some in solid colors.

Bodger Specializes in

A Vigorous, Growing Family

Some kinds of flowers go back to antiquity, and no significant change has taken place in their appearance in hundreds of years. But zinnias were not even discovered until the 1700's, and there continues to be active exploration of their breeding possibilities.

It Takes All Kinds

The tendency of gardeners to admire great size seems to be diminishing somewhat, so while the Bodger originations of Dahlia Flowered and California Giant types continue to be top in sales, introductions such as Ortho Polka in a 4-inch size flower have been received with enthusiasm.

There are good opportunities to increase the number of kinds of zinnias planted simply by drawing various classes to the gardeners' attention. The All-America winner Persion Carpet, for instance, produces many more blooms and is much more resistant to mildew and insect damage than any of the larger flowered types, and anyone who becomes acquainted with the variety admires it.

PERSIAN CARPET ZINNIA — Electros #3064G, \$40.00 per set.

DAHLIA FLOWERED GOLD MEDAL FINEST MIXED ZINNIAS — Electros #3070J, \$55.00 per set.

PUMILA SUNSHINE TINTS ZINNIA — Electros #3073F, \$35.00 per set.

Many Types of Zinnias

(and more to come!)

Research in Progress

Bodger research is now in progress along several avenues of approach among the different zinnias. We continue to make useful introductions in well-established classes, such as the new Pink Lady in the California Giant class, we are working on entirely new classes, of which Ortho Polka as a Giant Striata is an example, and of course we are advancing steadily into such promising fields as F_1 hybrids.

Cultivate the Interest

There's lots of interest in this most popular of all flowers grown from seed. Glance over the illustrations on this and preceding pages, and see if you are making the most of this easily grown, colorful, and varied family.

POSTERS AVAILABLE

Zinnia posters like the 1960 Bodger calendar are available on request.

CUPID MIXED ZINNIA — Electros #3071E,
\$30.00 per set.

PRIDE of Dieldrin ZINNIA — Electros #3107K, \$75.00 per set.

HARMONY MIXED ZINNIAS — Electros #3029E,
\$30.00 per set.

There's *EXTRA* Profit in

Why Feature Novelties and Special Strains?

There's more to novelties than just newness. Advances in technology actually make new flowers better, and worth having instead of the old models. Gardeners willingly pay more for these featured varieties because they get more for their money, and seedsmen make more profit on the higher unit sales.

REGAL MIXED LARKSPUR — Electros #3027G, \$40.00 per set.

POWDERPUFFS ASTER — Electros #3077H, \$47.50 per set.

PRINCESS IMPROVED ASTER — Electros #3026G, \$40.00 per set.

How Do These Strains Excel?

One way to assure excellence is by rigid quality control, as in the formula blending technique. Proper color balance is maintained in Regal Mixed Larkspur, for instance, by making up the mixture from separately grown colors. Another way is by changes in older strains. An example is Princess Improved Aster over the old Princess. Another improvement is Pampas Plume over the old Celosia Plumosa mixture.

Novelties and Special Strains

Powderpuffs Aster, Mandarin Cosmos, and Crackerjack Marigold excel by having unique characteristics.

Upgrading the Line

It is worth some time each year to go over your list of flower seeds. Do you

MANDARIN COSMOS — Electros #3105G, \$40.00 per set.

still offer Sunset Giants Marigold, Orange Flare Cosmos, Thompsoni Magnifica Celosia? Then you should seriously consider substituting Crackerjack, Mandarin, and Pampas Plume instead. A change in price from 15c to 25c per packet is not just an inflationary increase, but is merited by the change in strain.

Your customers want results in the garden, and will be grateful to you for making better performance possible for them.

CRACKERJACK MARIGOLD — Electros #3092H, \$47.50 per set.

PAMPAS PLUME CELOSIA — Electros #3079H, \$47.50 per set.

The Beauty

There are numbers of reasons for growing flowers, some related to the shape of the bloom, some to fragrance, some to cut flower qualities, but the most important factor of all is color.

You've often heard gardeners say, "I'm beginning to get some color in my garden." Or, "My garden is certainly colorful this year." Again and again you'll find the emphasis is on color, differences in color, and color accents or masses.

GERBERA GIANT HYBRIDS — Electros #3037G,
\$40.00 per set.

ALL-DOUBLE PORTULACA — Electros #3038G,
\$40.00 per set.

MARDI GRAS SNAPDRAGON — Electros #3096G, \$40.00 per set.

CONFETTI PETUNIA — Electros #3121G, \$40.00 per set

TITHONIA TORCH — Electros #3047G,
\$40.00 per set.

is in the COLOR !

So it is just good sense to do everything possible to show your customers as much color as you can. It is surprisingly difficult to describe in words the combination of colors in a flower like Chrysanthemum Merry Mixture, but when you can say, "See color illustration" (as we do now) the whole problem is solved. Moreover, a picture like this is worth a good deal more than the proverbial ten thousand words, for words create varying pictures depending on the imagination of the individual, and the color picture tells the same bright story to everyone.

Bodger has invested in color for many years, and there is now a large library of photographs and engravings for you to draw on. Since there are now available a number of types of viewers which give good enlargement and brilliance, and can be used effectively in full daylight, 35mm slides are an inexpensive, effective way to demonstrate color.

MULTIFLORA VERBENA — Electros #3018F,
\$35.00 per set.

MERRY MIXTURE CHRYSANTHEMUM — Electros #3014F,
\$35.00 per set.

For retail store display it is certainly desirable to use large colored posters and streamers. Each year Bodger produces such material, picturing current novelties, and these posters are available without charge.

Make use of all the color you can assemble. It is the thing people are thinking about when they plant a garden. It is the best way of all to sell flower seeds.

ROYAL CARPET ALYSSUM — Electros #3061J, \$55.00 per set.

TERMS OF SALE AND CONDITIONS OF DELIVERY

Prices quoted in this list go into effect immediately for spot sales and 1960 crop contracts, superseding all previous quotations.

Please Note!

There are several changes in pricing policy in this catalog which we believe will work to your advantage but which eliminate practices of many years standing.

1. We will no longer charge you for the containers in which the seed is packed. The price quoted for each unit of weight includes containers, whether V-seal or cotton bags.
2. Shipping cartons or bags and packing (that is, the exterior cover under which the seeds are shipped) will continue to be charged for as in the past, and are not returnable.
3. Quarter pounds, and other fractions of a pound, are now listed in detail in the catalog. Therefore, when you order $\frac{1}{4}$ lb. of seed you can find a specific price for it in the price list. **THIS MEANS THAT YOU NO LONGER CALCULATE $\frac{1}{4}$ LB. OR 6 OZ. OR OTHER FRACTIONS AT THE POUND RATE.** The rate is figured for you.
4. One ounce prices are, in general, much reduced from previous lists. This permits you to order 16 one ounce packages at what amounts to the pound rate plus labor and packaging cost to cover handling the smaller units.

HOW TO ORDER

If you use this catalog as an order form you will find it very simple to indicate the quantities you want on the dotted lines provided next to each item. We will replace your catalog with a fresh copy by return mail.

Examples:

Specify the number of packages you want of each size.			ASTER BOUQUET TYPE		No charge for containers			
Ounces	$\frac{1}{4}$ lbs.	1 lbs.	Bulk 5 lbs. or more		Per oz.	Per $\frac{1}{4}$ lb.	Per lb.	5 lbs. or more Per lb.
6		278	AZURE BOUQUET	1.95	7.75	30.50	30.00
2	1	280	CRIMSON BOUQUET	1.95	7.75	30.50	30.00
4	3	1282	DEEP CREAM BOUQUET	1.95	7.75	30.50	30.00
		5294	POWDERPUFFS	1.70	6.50	25.50	25.00
				LATHYRUS LATIFOLIUS				
.....2				MIXED65	2.25	8.50	8.00

In the first line (above) the order is for six 1 oz. packages of Aster Azure Bouquet. The 6 in the ounce column indicates the fact that six packages are wanted, and the fact that the price is printed in red indicates that the seed is pre-packed in this size in V-seal only. This line would be billed, then, at six times the ounce price of \$1.95, for a total of \$11.70.

In the second line (Crimson Bouquet) the order is for the same total amount of seed, but two 1 oz. packages and one $\frac{1}{4}$ lb. package are specified. This seed would be billed at twice the ounce price of \$1.95 plus one unit of the $\frac{1}{4}$ lb. size at \$7.75, for a total of \$11.65. These, because it is indicated by red figures, would be packed in V-seal.

In the third line (Deep Cream Bouquet) the order calls for four 1 oz. packages, three $\frac{1}{4}$ lb. packages, and one 1 lb. package, for a total value of \$61.55 for the total weight of 2 lbs. of seed, all in V-seal.

In the fourth line (Powderpuffs) five 1 lb. packages (in V-seal) are ordered, plus 5 lbs. in bulk, which would be in a cotton bag. The value here would be five times the 1 lb. price plus five times the pound price (in black) for bulk quantities of 5 lbs. or more.

In the last line (Lathyrus Latifolius Mixed) the wavy arrow calls attention to the fact that none of the unit prices are printed in red, so no seed is packed in V-seal, so whatever quantity is ordered the figure should be placed in the bulk column. In this case 2 lbs. are ordered, which would be billed at two times the 1 lb. price, for a total of \$17.00. If you should order 6 oz. of this seed it would be delivered in one cotton bag and priced at 1 1/2 times the 1/4 lb. price, or \$3.38.

V-SEAL vs. BULK SEED

Please note that wherever the price figure is printed in red the seed is pre-packaged in V-seal units, and is available only in those units. Where prices appear in black the seed is not processed and is not packed in V-seal.

ORDERING ON YOUR OWN FORMS

Should you place your order on our speedy self-mailing order blanks, your own purchase order, or ordinary letter, please indicate the number of units you wish to receive of each size.

Examples: If you want four 1 oz. packages, please write the order as follows:

4 x 1 oz.

If you want 3/4 lb. of seed please specify the size and number of units, as:

4 x 1 oz. or 12 x 1 oz. or 3 x 1/4 lb.
2 x 1/4 lb.

The minimum charge for each item billed will be fifty cents, due to the cost of handling small units.

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 1 % cash 30 days . All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery or from packaging in V-seal.

BODGER SEEDS LTD. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fires, and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

PICTURES, PLATES AND PUBLICITY

EKTACHROMES: If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can usually supply high quality 4 x 5 or 8 x 10 inch color photographs on a loan basis, the Ektachromes to be returned after use. Please write for information about availability of specific subjects in which you are interested. Sixty day rental fee Each \$15.00

PHOTOGRAPHS: We can supply professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8" x 10", single weight glossy paper. Each \$2.00

KODACHROME SLIDES: We can supply high-fidelity 35mm slides (mounted 2" x 2") of many of the flowers we grow. These are close-ups of individual flowers or groups, manufactured from our professional-size originals. Each 60c

HORTICULTURAL COLOR CHART: This is the most complete and useful compilation of horticultural colors available in the world. Assembled in two volumes of individual, unbound sheets which greatly facilitate color matching, the set is issued in collaboration with the Royal Horticultural Society and includes 200 pages with four graded tones of color on each page — a total of 800 different color blocks. The descriptive material includes equivalent color names in four other systems (such as Ridgeway), the synonyms in six foreign languages, and horticultural examples (for instance, color block 640/2 represents the color seen in *Scilla campanularia*). In the Bodger catalog the sweet peas, which are frequently distinguished by minor color differences, are adequately described by one or two sets of figures taken from this color chart.

For the immense versatility and wide acceptance in horticulture the price is very low. Complete set of two volumes, just \$12.00

PUBLICITY MATERIAL: Each spring we send a series of releases of garden information to hundreds of newspapers, radio and television stations, and magazines. They are widely used by garden editors. If you have need for this type of material, or if you have a suggestion to make concerning the addition of a publication or station to our list, just drop us a line and we'll be glad to comply. The service is free.

ELECTROS: We can supply electrotypes for use in printed matter of a great number of the pictures offered on the preceding page. 120 screen, usually square finish. Chosen from our Electro Catalog, our seed catalogs, or a selection of photos, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order. Prices below apply to copper. For nickel-steel, add 25 %.

COLOR PLATES: We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order.

Electros and Color Plates are supplied unmounted (patent base) unless mounting is specifically requested. There is an additional charge of 25 % for mounting. If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

ELECTRO PRICES ARE AS FOLLOWS:

Note: Our electro prices directly reflect the standard electrotyper's scale in Los Angeles, which in turn reflects the high wages now paid in the engraving industry. We cannot control this. Before ordering, consult your printer. In some localities he may be able to have black and white engravings made at lower cost than our prices.

SIZE	APPROX. DIMENSIONS	BLACK & WHITE	4-COLOR PROCESS
A.....	1 1/4" x 1 1/2"	\$3.65
B.....	2" x 2"	4.25
C.....	2" x 2 1/4"	4.45	\$22.50
D.....	2 1/4" x 2 1/4"	4.70	25.00
E.....	2 3/4" x 2 3/4"	5.15	30.00
F.....	2 3/4" x 3 1/4"	5.40	35.00
G.....	3 1/4" x 4 1/4"	6.50	40.00
H.....	4 1/4" x 5 1/4"	8.70	47.50
J.....	5" x 6"	10.75	55.00
K.....	Larger	15.00	75.00

If you print by lithography we can supply dot reproduction proofs of any of our color plates for easy conversion to offset printing. Cost is \$16.00 per set, regardless of size.

V-seal (Vitalseal) is a new program for processing and packaging flower seeds. Its object is to dry the seed to an unusually low point and to keep it dry in specially fabricated pouches in order to preserve the germination and vitality.

It has been demonstrated conclusively by research workers in many segments of agriculture that seed deteriorates mainly as the result of exposure to the high or varying humidity that is common throughout the world, and that the higher the humidity the quicker the deterioration. Conversely, at very low humidities seed maintains its ability to germinate for incredible lengths of time, even when the normal life span might be only a single season. Bodger research has been devoted to extending these basic principles to flower seeds and to developing a package which is flexible in size, durable, and highly resistant to moisture vapor transmission.

What does this Vitalseal program mean to you? First, it means that your flower seeds are dried promptly and scientifically upon harvest. This amounts to "curing" under control, a great improvement over taking chances with variations in the weather. It results in less chance of seed-borne disease and insect infestation, and promotes higher germination at the outset. The seed is dried to its ideal moisture content, a different point for different kinds. The ideal is the point at which the seed keeps best — not too dry, not too moist.

As soon as processing is complete the seed is stored in moisture-proof bulk containers until germination tests have been made, and then it is packed in various size units of V-seal pouches. This packing is done in a room which is held under rigid control at very low humidity and uniform temperature. Once heat-sealed the V-seal pouches maintain the low relative humidity like a time capsule, regardless of surrounding conditions. This sealed-in climate travels with the seed to you and retards aging so much that you can depend on the seed to germinate satisfactorily for as long as you care to hold it on inventory.

Of course, this is of prime importance to you in the case of short-lived types like aster, larkspur, delphinium, and so on, for inventory at the end of the season has always been a complete loss for responsible seedsmen. Even longer-lived kinds like zinnia keep better in V-seal and have greater vigor than unprotected seed after only a few months of storage under unfavorable conditions.

In the last analysis, what we are all trying to accomplish is to provide the gardener with fresh, vigorous, high-germinating seed. He gets just that if it has been held at its peak of perfection in V-seal, for the normal aging of the seed does not begin until the package has been opened, and both you and your customer may expect the seed to continue to live as long after it has been released from control as if it had been brought directly from the field at that time.

You will note as you leaf through our catalog that a number of the prices are printed in red ink. These are the varieties and units of size packed in V-seal this year. Others will be added in the future as our research continues.

You will get the most out of Vitalseal if you do a little calculating in advance of ordering. It is wise to order in multiple units, and then open the packages as needed. For example, instead of ordering a single 1 lb. package of aster, order 16 x 1 oz., or 4 x $\frac{1}{4}$ lb., or 2 x $\frac{1}{4}$ lb. and 8 x 1 oz. The reason for this method lies in the fact that once the seal has been broken the ideal storage conditions are lost, and resealing simply seals wet air (it may not feel wet to you, but it is) in the package.

Plan to store your V-seal inventory in a place of uniform temperature if you are seeking perfection. The basement is a good spot, for the moisture which made it unsuitable in the past has no effect on the V-seal pouches.

V-seal is important to you because it assures you of top quality seed on shelf, regardless of the length of its journey to you or the humidity through which the pouches may have passed. It is important because it keeps the seed fresh for as long as you may need to hold it yourself. It is important because your customers will find the seeds you sell to be unusually vigorous and high in germination.

ASTERS

All Asters listed here can be grown by the home gardener wherever Asters are popular. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

PRINCESS ASTERS (BODGER)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

ASTER PRINCESS IMPROVED WILT RESISTANT (Marsha type)

New, compact branching plant form 20" - 24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing. These varieties are so superior in plant and flower that we have dropped the old Princess strain from our catalog.

ANTIRRHINUM (Snapdragon)

ANTIRRHINUM F₁ HYBRID ROCKETS (Hybrid Snapdragon) (af)

While F₁ hybrid snaps have been in use by greenhouse growers for some time, this series of Rocket hybrids is the first to be marketed for outdoor garden use. Each of the varieties has received an award individually in the All-America Selections, and the class as a whole has also received All-America recognition. The reliability and endurance of these fine hybrids was demonstrated across the entire country last year, and their superiority above standard varieties is as evident as that of F₁ petunias over open pollinated strains. A trade pkt. equals 1/128 oz.

		No charge for containers

GERBERA (Transvaal Daisy) (grf)

A superior strain of good vitality developed recently on the Pacific Coast, containing single and semi-double flowers with a greatly improved color range, especially in the desirable light shades.

Best germination results from the following technique. Dust seed with chlordane to prevent pre-emergence insect damage. Sow on top of seed bed, covering as lightly as possible with peat or similar material. Hold only slightly moist for first 4 days and give heavy moisture thereafter. Germination begins in 7 to 9 days and is complete in 14 days.

5378	PANSY "101" (Bodger), a special strain for the quality market grower, bearing giant waved flowers of fine substance and blotching characteristic of the best "English" type, on compact plants. Full mixture of colors; stout stems. Offered only in Vitalseal.	.60	1.75	6.50	25.00	100.00
	
5342	ENGELMANN'S GIANT (f), attractive, huge flowers, choice bedding and cut flower strain. In Carl Engelman, Ltd., sealed paper packets.					
	
5372	SWISS SELECT, the finest pansy we offer in the Swiss type, designed for the market grower who demands supreme quality. Flowers are of heavy substance with sharply delineated markings and a full color range except for white. Offered only in Vitalseal pouches.					
	
5370	KING SIZE MIXED, a brand new and superlative pansy mixture with exactly the characteristics that appeal most to market growers. The plants are quick-starting, husky, and come into production with Swiss Giants. Blooms are giant in size, much larger than Swiss Giants, and yet possessing excellent substance. The colors include combinations of mahogany and bronze, mahogany and gold, mahogany and yellow, mahogany and red, a substantial amount of raspberry-rose, and combinations of violet and white, and violet and cream. This fortunate wedding of giant flower size, good substance, and heavy and long-term production makes King Size a strong contender for top favor among plant growers and home gardeners alike. Be sure to get some seed in the hands of your key customers for evaluation. Offered only in Vitalseal pouches.	1.00	3.50	12.75	50.00	200.00

F₁ HYBRID PETUNIAS

F₁ hybrid petunias are divided into three broad classes, multifloras, grandifloras and doubles. All show greater vigor and greater flower production than the old open pollinated types from which they were derived, but between hybrids there are differences well worth noting. The F₁'s listed in this catalog have all been tested in exhaustive trials which are conducted annually by our research department, and we believe them to be the outstanding colors in each class.

All F₁'s are packed in V-seal to preserve vigor and germinating ability. Seed count averages 345,000 per ounce; a trade packet contains approximately 1/192 of an ounce.

PETUNIA F₁ HYBRID MULTIFLORA (af)

The multiflora class has flowers which correspond in size and character to the old hybrida and hybrida nana compacta types, but the comparison ends at that point, for F₁'s have impressively greater capacity to produce flowers than their open pollinated parents, and the breeder has been able to exert closer control over plant habit as well, increasing uniformity and reducing undesirable characteristics. A prime example is the Satin group, listed below.

THE SATINS

With Red Satin leading the way in 1957, earning an All-America award in that year, the Satin class has expanded until there are now five hybrids of similar plant and flower type. The class is outstanding in its dwarf, compact habit of growth.

(Specify the number of packages you want of each size.)

No charge for containers

		Trade Packet	1/32 oz.	1/16 oz.	1/4 oz.	1 oz.
8996	CORAL SATIN (Bodger)  '61. With its true Satin-style, tenaciously compact plants, its ability to bloom beautifully right through rainy and windy periods, and its lovely coral-rose flowers Coral Satin now wins the same All-America honors for 1961 as Red Satin did in 1957. Plants retain their low mound form even to the end of the season, filling their centers with blooms instead of splitting open as they age. Flowers are 2" to 2 1/2" across, midway between Peach and Red Satin in color effect. Illustrated on front cover.	1.55	8.00	15.50	61.50	245.00
	
9016	PEACH SATIN (Bodger), a lovely multiflora with unusually large flowers which open first to a coral color, changing the next day to an appealingly soft salmon-pink. Plants are well-behaved, compact and carry the will-to-bloom feature so prominent in the best F ₁ hybrids. (A.M., R.H.S. '59)	1.10	5.75	11.50	45.25	180.00
	
9018	PINK SATIN (Bodger), increasingly popular, for its rounded, compact plant habit, tremendous production of blooms, and excellent rose-pink color all come close to the ideal for this class. Time after time in comparative trials Pink Satin not only surpasses other multifloras in neatness and floriferousness during the course of the season but continues to look fresh and young after all those around it have deteriorated in old age. (A.M., R.H.S. '59)

THE SATINS (Continued)		(Specify the number of packages you want of each size.)				
		No charge for containers				
		Trade Packet	1/32 oz.	1/16 oz.	1/4 oz.	1 oz.
9026	RED SATIN (Bodger)  '57. The vivid scarlet-red All America winner with the persistently dwarf, compact, rounded plants so warmly welcomed by gardeners. Pictured and described on page 3. (A.M., R.H.S. '59)	1.10	5.75	11.50	45.25	180.00
8990	WHITE SATIN (Bodger), new this year, and a welcome addition to the Satin class, these pure white flowers are borne on typical Satin-type plants and have the added feature of a slight crepe effect in the petals. White Satin comes into bloom earlier than other white multifloras, and preserves its neat appearance to the very end of the season.

OTHER F₁ HYBRID MULTIFLORAS

9006	BLUE RIBBON (Bodger), this top-notch multiflora hybrid blooms freely and reliably in all areas, bearing large numbers of deep, violet-blue flowers. Seedsmen of wide experience in hybrid petunias call this the best blue multiflora presently on the market, but it is not included among the Satins because of its larger plant habit. (A.M., R.H.S. '59)	1.10	5.75	11.50	45.25	180.00
9002	AZTEC, scarlet with gold throat.	1.00	4.25	8.25	31.50	125.00
9004	COMANCHE  '53, scarlet red.
8982	COMET, crimson-red with perfect white star.
9008	GLITTERS,  '57. Attractive bicolor red and white.	1.40	7.50	14.25	56.50	225.00
9010	INCA, rose-red with gold throat.	1.00	4.25	8.25	31.50	125.00
8984	MARS, crimson-red.
9098	NEPTUNE, medium violet blue.
9020	PALEFACE  '55, white
8988	SATELLITE, rose with white star.
9096	SUGAR PLUM, orchid pink, penciled and shaded orchid-purple. Most spectacular for a multiflora and very reliable.
8998	F ₁ MULTIFLORA MIXTURE, all colors blended.

Sizes priced in red are packed only in Vitalseal.
Sizes priced in black are not packed in Vitalseal.

PETUNIA F₁ HYBRID GRANDIFLORA (af)

The grandiflora class has flowers which correspond to the open pollinated grandifloras, with larger blooms than the multifloras, but generally somewhat fewer. Nonetheless, a good grandiflora hybrid will give the same mass-of-bloom effect as multifloras because even though less in number the larger blooms tend to cover the plants completely during their heaviest blooming periods. Some hybrids in this class are heavily fringed or ruffled, while others have plain edges but extra large blooms measuring up to 4 1/2" across.

THE LUSTRES

This superior group, beginning with Blue Lustre, is now expanded to the four hybrids listed below. All have waved petals, all have compact, low-growing plants, all produce well under a wide range of climatic conditions.

(Specify the number of packages you want of each size.)

petals, all have compact, low-growing plants, all produce well under a wide range of climatic conditions.		No charge for containers				
		Trade Packet	1/32 oz.	1/16 oz.	1/4 oz.	1 oz.
9052	BLUE LUSTRE (Bodger), the big waved grandiflora flowers are deep mid-blue in hot weather, becoming almost as dark as Elk's Pride in cool weather. Plants grow 1 foot tall and 1 1/2 to 2 feet across, beginning to bloom very early and continuing without interruption to the very end of the season. See color illustration on page 4. (A.M., R.H.S. '59)	2.00	10.25	20.25	80.25	320.00
9072	SALMON LUSTRE (Bodger), while the exact color of an individual flower is hard to define, the garden effect of this new and beautiful Lustre is a rich salmon-pink. Plants grow only a foot tall, spread to two feet across, and produce steadily over the whole plant area right through the season. See color illustration on page 5.
9070	SCARLET LUSTRE (Bodger), glowing and vivid scarlet blooms with waved and fringed petal edges and a bright yellow throat make this new grandiflora hybrid an instant favorite. Scarlet Lustre is sturdy of plant and generous of bloom. Plants reach a height of only 1 foot, spreading to 2 feet across and blooming steadily over the entire area. See the illustration on page 5. (H.C., R.H.S. '59)
9064	ROSE LUSTRE (Bodger), a brand new hybrid, and with a strong rose-pink color unique in its class. It is hard to imagine how brilliant, how commanding these flowers can be, but comparison with others is most convincing. Blooms are 3 1/2" across, waved and lightly fringed, and with a light yellow throat. See color illustration on page 4.

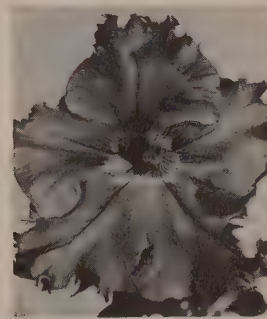

Sizes priced in red are packed only in Vitalseal.
Sizes priced in black are not packed in Vitalseal.

PELLETED SEED

F₁ HYBRID PETUNIAS

The technique of applying an inert coating to small, expensive seeds has advanced greatly in recent years. Pelleted seed is now reliable and quick in germination, and with this fact the obvious advantages of the processed seed can be utilized.

Increasing the size of F₁ hybrid petunia seed to approximately the size of Balsam seed makes it possible for the seed to be packaged by machinery, makes inner liners unnecessary, makes 100 seeds look like a respectable amount, and makes it possible for amateur gardeners to space and plant these expensive seeds in such a way as to make success much more likely than with raw seed.

Special planting instructions are imperative when pelleted petunia seed is delivered, and we will be glad to provide a suggested cultural technique on request.

In general, there is about an 80-fold increase in size between raw and pelleted petunia seed, although this may vary somewhat.

We expect to have supplies of each of the hybrids listed below pelleted and in stock for delivery at normal shipping time. The coated seed will be processed and packed in V-seal pouches.

ZINNIAS (See pages 28 thru 32)

SWEET PEAS

The numbers in parenthesis following Sweet Pea descriptions refer to color chart readings. See page 20.

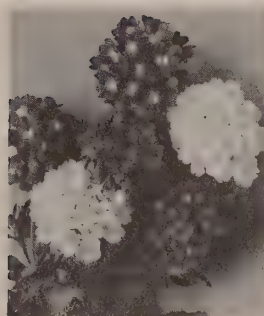

SWEET PEA EARLY or WINTER FLOWERING SPENCER (af)

The variety we consider best in each color class is indicated by an asterisk (*). The sharp reduction in the number of varieties offered in this class reflects the increasing popularity of the Zvolanek Multiflora group, which has the same blooming period.

SWEET PEA ZVOLANEK MULTIFLORA (af)

A garden sweet pea more vigorous than Early Spencers, yet true winter flowering for florists. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the Early Spencers. We recommend this strain.

....8736 BEAUTY ROSE, rich crimson rose (727/1)60	2.25	2.00
....8762 BLUE WONDER, clear medium blue60	2.25	2.00
....8718 CHRISTMAS RED, crimson (822/3)60	2.25	2.00

It must be remembered that these dates are approximate, and for a normal year. Adverse weather and other conditions we cannot control may delay delivery at certain times.

V-seal saves seeds

Be ready for anything!

With V-seal you are equally prepared for extra business or slow business, because for the first time you can safely stock perishable flower seeds.

If you have V-seal on the shelf you are ready when your customer is ready, and both of you can be confident that the seed you sell is genuinely harvest-fresh.

V-seal means extra sales, extra satisfied customers, and best of all it means that you sell instead of throw away your carry-over seed.
